## Seafloor Geomorphology as Benthic Habitat: GeoHAB Atlas of Seafloor Geomorphic Features and Benthic Habitats From Elsevier

The conservation of marine benthic biodiversity is a recognised goal of a number of national and international programs such as the United Nations Convention on Biodiversity (CBD). In order to attain this goal, information is needed about the distribution of life in the ocean so that spatial conservation measures such as marine protected areas (MPAs) can be designed to maximise protection within boundaries of acceptable dimensions. Ideally, a map would be produced that showed the distribution of benthic biodiversity to enable the efficient design of MPAs. The dilemma is that such maps do not exist for most areas and it is not possible at present to predict the spatial distribution of all marine life using the sparse biological information currently available.

Knowledge of the geomorphology and biogeography of the seafloor has improved markedly over the past 10 years. Using multibeam sonar, the benthic ecology of submarine features such as fjords, sand banks, coral reefs, seamounts, canyons, mud volcanoes and spreading ridges has been revealed in unprecedented detail.

This book provides a synthesis of seabed geomorphology and benthic habitats based on the most recent, up-to-date information. Introductory chapters explain the drivers that underpin the need for benthic habitat maps, including threats to ocean health, the habitat mapping approach based on principles of biogeography and benthic ecology and seabed (geomorphic) classification schemes. Case studies from around the world are then presented. They represent a range of seabed features where detailed bathymetric maps have been combined with seabed video and sampling to yield an integrated picture of the benthic communities that are associated with different types of benthic habitat. The final chapter examines critical knowledge gaps and future directions for benthic habitat mapping research.

- Reviews and compares the different methodologies currently being used
- Includes global case studies
- Provides geological expertise into what has traditionally been a biological discipline

### **Editorial Review**

### **Users Review**

#### **From reader reviews:**

#### **Clarence Hamm:**

The book Seafloor Geomorphology as Benthic Habitat: GeoHAB Atlas of Seafloor Geomorphic Features and Benthic Habitats can give more knowledge and also the precise product information about everything you want. So why must we leave the great thing like a book Seafloor Geomorphology as Benthic Habitat: GeoHAB Atlas of Seafloor Geomorphic Features and Benthic Habitats? Several of you have a different opinion about e-book. But one aim that book can give many info for us. It is absolutely proper. Right now, try to closer with the book. Knowledge or data that you take for that, you are able to give for each other; you may share all of these. Book Seafloor Geomorphology as Benthic Habitat: GeoHAB Atlas of Seafloor Geomorphic Features and Benthic Habitats has simple shape however, you know: it has great and massive function for you. You can appearance the enormous world by open up and read a book. So it is very wonderful.

#### **Nancy Deanda:**

Reading a publication can be one of a lot of exercise that everyone in the world adores. Do you like reading book consequently. There are a lot of reasons why people love it. First reading a publication will give you a lot of new facts. When you read a guide you will get new information because book is one of a number of ways to share the information or maybe their idea. Second, reading a book will make anyone more imaginative. When you examining a book especially fiction book the author will bring one to imagine the story how the personas do it anything. Third, you are able to share your knowledge to other folks. When you read this Seafloor Geomorphology as Benthic Habitat: GeoHAB Atlas of Seafloor Geomorphic Features and Benthic Habitats, you may tells your family, friends and soon about yours guide. Your knowledge can inspire the mediocre, make them reading a e-book.

#### **Jackie Peters:**

A lot of people always spent their own free time to vacation or go to the outside with them loved ones or their friend. Were you aware? Many a lot of people spent many people free time just watching TV, as well as playing video games all day long. If you want to try to find a new activity that's look different you can read a new book. It is really fun in your case. If you enjoy the book you read you can spent the entire day to reading a e-book. The book Seafloor Geomorphology as Benthic Habitat: GeoHAB Atlas of Seafloor Geomorphic Features and Benthic Habitats it is very good to read. There are a lot of folks that recommended this book. These people were enjoying reading this book. When you did not have enough space to create this book you can buy the particular e-book. You can m0ore very easily to read this book through your smart phone. The price is not to fund but this book possesses high quality.

**Nancy Herman:**

In this period globalization it is important to someone to receive information. The information will make anyone to understand the condition of the world. The fitness of the world makes the information much easier to share. You can find a lot of references to get information example: internet, newspapers, book, and soon. You can observe that now, a lot of publisher in which print many kinds of book. Often the book that recommended to your account is Seafloor Geomorphology as Benthic Habitat: GeoHAB Atlas of Seafloor Geomorphic Features and Benthic Habitats this guide consist a lot of the information from the condition of this world now. This particular book was represented how does the world has grown up. The words styles that writer use to explain it is easy to understand. The writer made some exploration when he makes this book. That is why this book suitable all of you.
