## A First Course in Monte Carlo By George Fishman

A FIRST COURSE IN MONTE CARLO shows you how to design, perform, and analyze the results of MC experiments based on independent replications, Markov chain MC, and MC optimization. The text emphasizes the variance-reducing techniques of importance sampling, stratified sampling, Rao-Blackwellization, control variates, antithetic variates, and quasi-random numbers. For solving optimization problems it describes several MC techniques, including simulated annealing, simulated tempering, swapping, stochastic tunneling, and genetic algorithms. Examples from many areas show how these techniques perform in practice. Hands-on exercises allow you to experience challenges encountered when solving real problems. An answer key to selected problems is included.

## **Editorial Review**

### About the Author

George Fishman has regularly contributed to the literature on the Monte Carlo method and discrete-event simulation over the last 40 years. His earlier book, MONTE CARLO: CONCEPTS, ALGORITHMS, AND APPLICATIONS (Springer-Verlag, 1996) won the 1996 Lancaster award for best publication of the Institute for Operations Research and Management Sciences (INFORMS) and the 1997 outstanding publication award of the INFORMS College on Simulation.

## **Users Review**

### **From reader reviews:**

#### **Christi Potter:**

Do you one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Make an effort to pick one book that you find out the inside because don't determine book by its deal with may doesn't work here is difficult job because you are frightened that the inside maybe not since fantastic as in the outside search likes. Maybe you answer might be A First Course in Monte Carlo why because the wonderful cover that make you consider in regards to the content will not disappoint you. The inside or content is fantastic as the outside or even cover. Your reading sixth sense will directly make suggestions to pick up this book.

#### **Jesus Thresher:**

The book untitled A First Course in Monte Carlo contain a lot of information on the idea. The writer explains your girlfriend idea with easy method. The language is very clear and understandable all the people, so do certainly not worry, you can easy to read the item. The book was compiled by famous author. The author will take you in the new age of literary works. You can easily read this book because you can continue reading your smart phone, or gadget, so you can read the book throughout anywhere and anytime. If you want to buy the e-book, you can open their official web-site as well as order it. Have a nice read.

#### **Irvin Ehlers:**

In this age globalization it is important to someone to get information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of recommendations to get information example: internet, classifieds, book, and soon. You will observe that now, a lot of publisher this print many kinds of book. The book that recommended for you is A First Course in Monte Carlo this publication consist a lot of the information on the condition of this world now. This book was represented how do the world has grown up. The dialect styles that writer make usage of to explain it is easy to understand. The actual writer made some research when he makes this book. That's why this book suitable all of you.

**Johnny Relyea:**
