Mindshaping: A New Framework for Understanding Human Social Cognition (MIT Press) By Tadeusz Wieslaw Zawidzki

In this novel account of distinctively human social cognition, Tadeusz Zawidzki argues that the key distinction between human and nonhuman social cognition consists in our complex, diverse, and flexible capacities to shape each other's minds in ways that make them easier to interpret. Zawidzki proposes that such "mindshaping" -- which takes the form of capacities and practices such as sophisticated imitation, pedagogy, conformity to norms, and narrative self-constitution -- is the most important component of human social cognition. Without it, he argues, none of the other components of what he terms the "human sociocognitive syndrome," including sophisticated language, cooperation, and sophisticated "mindreading," would be possible.

Challenging the dominant view that sophisticated mindreading -- especially propositional attitude attribution -- is the key evolutionary innovation behind distinctively human social cognition, Zawidzki contends that the capacity to attribute such mental states depends on the evolution of mindshaping practices. Propositional attitude attribution, he argues, is likely to be unreliable unless most of us are shaped to have similar kinds of propositional attitudes in similar circumstances. Motivations to mindshape, selected to make sophisticated cooperation possible, combine with low-level mindreading abilities that we share with nonhuman species to make it easier for humans to interpret and anticipate each other's behavior. Eventually, this led, in human prehistory, to the capacity to attribute full-blown propositional attitudes accurately -- a capacity that is parasitic, in phylogeny and today, on prior capacities to shape minds. Bringing together findings from developmental psychology, comparative psychology, evolutionary psychology, and philosophy of psychology, Zawidzki offers a strikingly original framework for understanding human social cognition.

Editorial Review

Review

Humans have extraordinarily complex minds, yet we are not opaque to one another. We coordinate remarkably well on the basis of mutual expectations of one another's acts. The received view is that we do this through a remarkably accurate and powerful theory of mind, a theory that we apply in social navigation. Zawidzki has picked up an alternative -- we shape one another's minds in development and in normal social interaction, thus making human thought and motivation vastly more stable, coherent, and transparent than it would otherwise be. Zawidzki has taken this idea and developed it into a cohesive and systematic view of the evolution and development of human cognition.

(Kim Sterelny, School of Philosophy, Australian National University; author of *The Evolved Apprentice: How Evolution Made Humans Unique*)

Mindshaping practices and mechanisms are crucial in the social lives of humans. In this insightful book, Zawidzki develops an interesting hypothesis about the role that mindshaping plays in human ontogenetic development, and about the role it played in human evolution. The mindshaping framework elaborated here is a useful tool for making progress in the understanding of our peculiar species.

(Matteo Mameli, Reader in Philosophy, King's College London)

The core idea of *Mindshaping* is dazzling in its simplicity and explanatory power: the interpretation of human behavior essentially depends on current regulative practices. This stimulating book develops highly controversial but challenging claims that everyone interested in social cognition and in propositional attitudes should want to think about.

(Joëlle Proust, Director of Research, National Center for Scientific Research (C.N.R.S.), Institut Jean-Nicod)

The core hypothesis of *Mindshaping* is likely to be true...sophisticated...There is much to admire about this book and it is enjoyable to read...an important book.

(*Notre Dame Philosophical Reviews*)

Zawidzki makes an admirable attempt to synthesize a wide range of phenomena...He also gives an admirably clear overview of the theoretical landscape, and for this reason alone I would recommend *Mindshaping* to both experts and novices alike.

(*Phenomenology and the Cognitive Sciences*)

Mindshaping is a *tour de force*. It rigorously reenvisioned humans' deeply social nature and presents a penetrating challenge to entrenched intuitions about the centrality of folk psychology. Its key innovation is the idea that our individual abilities to make sense of ourselves and other people is a "group accomplishment" grounded in our shared practices for regulating behavior.

(The Review of Metaphysics)

About the Author

Tadeusz Wieslaw Zawidzki is Associate Professor of Philosophy and Codirector of the Mind-Brain Evolution Cluster at the George Washington University. He is the author of *Dennett*.

Users Review

From reader reviews:

Terrance Hutchins:

In this 21st hundred years, people become competitive in most way. By being competitive at this point, people have do something to make these individuals survives, being in the middle of the crowded place and notice by simply surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. Yeah, by reading a publication your ability to survive improve then having chance to endure than other is high. For you who want to start reading a new book, we give you this Mindshaping: A New Framework for Understanding Human Social Cognition (MIT Press) book as basic and daily reading reserve. Why, because this book is more than just a book.

Helen Jackson:

Reading can called thoughts hangout, why? Because if you are reading a book specially book entitled Mindshaping: A New Framework for Understanding Human Social Cognition (MIT Press) your mind will drift away trough every dimension, wandering in each and every aspect that maybe unfamiliar for but surely can be your mind friends. Imaging every word written in a publication then become one web form conclusion and explanation this maybe you never get before. The Mindshaping: A New Framework for Understanding Human Social Cognition (MIT Press) giving you one more experience more than blown away your head but also giving you useful facts for your better life within this era. So now let us show you the relaxing pattern the following is your body and mind will be pleased when you are finished studying it, like winning a casino game. Do you want to try this extraordinary spending spare time activity?

Kirk Banks:

Is it you who having spare time in that case spend it whole day through watching television programs or just lying on the bed? Do you need something new? This Mindshaping: A New Framework for Understanding Human Social Cognition (MIT Press) can be the solution, oh how comes? A fresh book you know. You are so out of date, spending your extra time by reading in this brand-new era is common not a nerd activity. So what these publications have than the others?

Ronnie Correa:

On this era which is the greater man or woman or who has ability to do something more are more valuable than other. Do you want to become one of it? It is just simple approach to have that. What you should do is just spending your time very little but quite enough to enjoy a look at some books. On the list of books in the top collection in your reading list will be Mindshaping: A New Framework for Understanding Human Social Cognition (MIT Press). This book which is qualified as The Hungry Hills can get you closer in getting

precious person. By looking upward and review this reserve you can get many advantages.
