The Integrated Architecture Framework Explained: Why, What, How By Jack van't Wout, Maarten Waage, Herman Hartman, Max Stahlecker, Aaldert Hofman

When I joined Capgemini back in 1996 I was amazed by investment that had been made in developing Enterprise Architecture, and at the root of this, the IAF methodology. Back in the mid 1990s the importance of architecture was dimly recognised but certainly it was not widely understood as a crucial element of successful enterprise wide IT implementation. A decade later with the huge growth in the role, the sophistication, and importance of Information Technology it has become recognized, and established for the value it brings. With this recognition has come various forms of 'standardization' ranging from the work of the Open Group and its moves to establish TOGAF as a common framework, together with ITAC to certify architects, through to a wide variety of product vendor architects, even to some industry sectors establishing their own architectures. Has this diminished, or even may be removed the need for IAF? Well it might have done if the world had stood still, but it hasn't. Simultaneously the range and complexity of technology has increased, the functionality has been extended to embrace new front office capabilities and most of all the externalization and globalization of business has added a whole new extra dimension. Standardization might have improved connections and interfaces, and in so doing produced 'systems' of apparently limitless extendibility, but it has done little to improve the necessary 'understanding'.

Editorial Review

From the Back Cover

This book captures and communicates the wealth of architecture experience Capgemini has gathered as a member of The Open Group – a vendor- and technology-neutral consortium formed by major industry players – in developing, deploying, and using its “Integrated Architecture Framework” (IAF) since its origination in 1993. Today, many elements of IAF have been incorporated into the new version 9 of TOGAF, the related Open Group standard. The authors, all working on and with IAF for many years, here provide a full reference to IAF and a guide on how to apply it. In addition, they describe in detail the relations between IAF and the architecture standards TOGAF and Archimate and other development or process frameworks like ITIL, CMMI, and RUP. Their presentation is targeted at architects, project managers, and process analysts who have either considered or are already working with IAF – they will find many roadmaps, case studies, checklists, and tips and advice for their daily work.

About the Author

Jack van 't Wout started in IT in 1978 and joined Capgemini in 1990. He got involved with architecture in 1993, and is generally acknowledged as one of the founding fathers of IAF. Jack has executed over 20 enterprise architecture and governance engagements and has trained more than 500 people in IAF. Jack's focus is on the financial services sector.

Maarten Waage has worked in the IT industry since 1984 and joined Capgemini's precursor Volmac one year later in the Systems and Networks division. He has been practicing architecture since 1995 and got involved in IAF development and deployment in 1997. Maarten has extensive experience in enterprise architecture and large scale transformations. He focuses on the public sector.

Herman Hartman has worked with Capgemini and its predecessor Volmac since 1976. He became involved in the development of IAF in 1994 when he laid the basis to encapsulate existing architecture best practices in new ways of working. He has conducted architecture work in dozens of projects. Herman focuses on enterprise architecture engagements in the industry sector.

Max Stahlecker is the youngest member of the team of authors. He is in the IT industry since 2001. Max did his thesis on enterprise architecture, architectural conformance and business transformation. He has been practicing architecture with IAF since he joined Capgemini 2006 and has been involved with its development since then.

Aaldert Hofman started to work with Capgemini in 1990 and worked in the IT industry since 1988. He has developed architectures since 1996 and got involved in IAF development and lecturing in 1998. Aaldert is specialized in security architecture and the broader risk management theme.

Users Review

From reader reviews:

Ross Fletcher:

The reason why? Because this The Integrated Architecture Framework Explained: Why, What, How is an unordinary book that the inside of the book waiting for you to snap the idea but latter it will zap you with the

secret that inside. Reading this book beside it was fantastic author who also write the book in such incredible way makes the content on the inside easier to understand, entertaining technique but still convey the meaning fully. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This book will give you a lot of positive aspects than the other book have got such as help improving your talent and your critical thinking method. So , still want to delay having that book? If I were you I will go to the e-book store hurriedly.

Pam Gray:

Reading can called mind hangout, why? Because if you find yourself reading a book especially book entitled The Integrated Architecture Framework Explained: Why, What, How your brain will drift away trough every dimension, wandering in every aspect that maybe unfamiliar for but surely can become your mind friends. Imaging every word written in a publication then become one contact form conclusion and explanation that maybe you never get ahead of. The The Integrated Architecture Framework Explained: Why, What, How giving you yet another experience more than blown away your head but also giving you useful info for your better life with this era. So now let us show you the relaxing pattern here is your body and mind is going to be pleased when you are finished examining it, like winning a sport. Do you want to try this extraordinary investing spare time activity?

Patrick Stokes:

As we know that book is very important thing to add our know-how for everything. By a publication we can know everything we want. A book is a range of written, printed, illustrated or perhaps blank sheet. Every year was exactly added. This publication The Integrated Architecture Framework Explained: Why, What, How was filled with regards to science. Spend your free time to add your knowledge about your research competence. Some people has distinct feel when they reading some sort of book. If you know how big benefit from a book, you can sense enjoy to read a book. In the modern era like now, many ways to get book which you wanted.

Lionel Huggins:

Book is one of source of expertise. We can add our information from it. Not only for students but also native or citizen have to have book to know the revise information of year to help year. As we know those guides have many advantages. Beside all of us add our knowledge, could also bring us to around the world. By the book The Integrated Architecture Framework Explained: Why, What, How we can acquire more advantage. Don't you to definitely be creative people? To become creative person must want to read a book. Simply choose the best book that suitable with your aim. Don't be doubt to change your life with this book The Integrated Architecture Framework Explained: Why, What, How. You can more inviting than now.
