Enterprise Value: Governance of IT Investments - The Val IT Framework 2.0 By IT Governance Institute

This publication is the foundation document in the Val IT series. It presents practices for three domains:

- Value Governance
- Portfolio Management
- Investment Management

Each of these domains is broken down into key management processes and a number of key management practices.

The new edition simplifies the management processes and practices, and extends the Val IT Framework beyond new investments to include IT services, assets and other resources. It also aligns terminology with COBIT, and adds a management guidelines section, similar to COBIT, which provides a greater level of detail on the Val IT processes, key management practices and maturity models for each Val IT domain.
