Mycotoxins in Food, Feed and Bioweapons From Brand: Springer

Mycotoxins are made by different biosynthetic pathways, and they have an extremely wide range of pharmacological effects. This book will update readers on several cutting-edge aspects of mycotoxin research, including topics such as: new analytical methods for detection; the adoption of an ancient Mexican process for detoxification of aflatoxins; mycotoxin management in Ireland, Lithuania and South America; mycotoxin reduction through plant breeding and integrated management practices; and natural aflatoxin inhibitors from medicinal plants. Further contributions examine ochratoxins, selected trichothecenes, zearalenone, and aflatoxin-like gene clusters, as well as sclerotial development in *Aspergillus flavus* and *A. parasiticus*. Of particular interest are the chapters on the potential use of mycotoxins as bioweapons. This book will stimulate new thinking on the need to develop therapeutic as well as preventative interventions to reduce the toxicological threat of mycotoxins.

Editorial Review

Review

From the reviews:

“The book is organized into three general areas. They are: Biology and biotechnology, Agriculture and food, and Toxicology and bioweapons. ... Information is presented in sufficient depth to engage readers with an interest in mycotoxins or mycology. Researchers looking for a compendium of recent and relevant information on mycotoxins should consider adding this book to their reference shelf.” (H. Schurz Rogers, *World Mycotoxin Journal*, Vol. 3 (2), May, 2010)

“Mycotoxins have been reviewed many times, but this book claims to target new areas, including new detection methods, an ancient Mexican process for detoxification, mycotoxin management printed on good quality paper, has four colour features, 405 pages, 35 illustrations and the text is of average size. ... chapters are very varied, with a range of interesting topics, and provide a very good account of the topic of mycotoxins by an expert group of authors. The book should be available in University libraries.” (*Fungal Diversity*, Vol. 49 (1), July, 2011)

Users Review

From reader reviews:

Charity Reulet:

Often the book *Mycotoxins in Food, Feed and Bioweapons* will bring that you the new experience of reading a new book. The author style to spell out the idea is very unique. In the event you try to find new book to learn, this book very ideal to you. The book *Mycotoxins in Food, Feed and Bioweapons* is much recommended to you you just read. You can also get the e-book in the official web site, so you can more easily to read the book.

Allison Price:

This *Mycotoxins in Food, Feed and Bioweapons* is great guide for you because the content that is full of information for you who always deal with world and still have to make decision every minute. This kind of book reveal it details accurately using great organize word or we can declare no rambling sentences within it. So if you are read the item hurriedly you can have whole facts in it. Doesn't mean it only will give you straight forward sentences but tough core information with splendid delivering sentences. Having *Mycotoxins in Food, Feed and Bioweapons* in your hand like having the world in your arm, data in it is not ridiculous one. We can say that no publication that offer you world inside ten or fifteen second right but this publication already do that. So , it is good reading book. Hi Mr. and Mrs. occupied do you still doubt that will?

Thanh Johnson:

That publication can make you to feel relax. This particular book Mycotoxins in Food, Feed and Bioweapons was multi-colored and of course has pictures on there. As we know that book Mycotoxins in Food, Feed and Bioweapons has many kinds or type. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and think you are the character on there. Therefore , not at all of book are make you bored, any it offers you feel happy, fun and relax. Try to choose the best book for you and try to like reading this.

Megan Kelly:

Reading a book make you to get more knowledge from this. You can take knowledge and information from your book. Book is prepared or printed or illustrated from each source in which filled update of news. In this modern era like at this point, many ways to get information are available for an individual. From media social just like newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your understanding by that book. Ready to spend your spare time to open your book? Or just in search of the Mycotoxins in Food, Feed and Bioweapons when you necessary it?
