### Neurology of Sexual and Bladder Disorders, Volume 130 (Handbook of Clinical Neurology) From Elsevier

The neurology of sex and bladder disorders requires specialized knowledge and represents a challenge for clinical neurologists focused on the neurological condition. Sex and bladder disorders are often related to more general neurological disorders like Parkinson's disease and multiple sclerosis, and often the sex and bladder disorders are passed to specialists in urology. *Neurology of Sexual and Bladder Disorders: Handbook of Clinical Neurology* is a focused, yet comprehensive overview that provides complete tutorial reference to the science, diagnosis and treatment of sex and bladder disorders from a neurologic perspective.

- Comprehensive coverage of the neurology of sex and bladder disorders
- Details the latest techniques for the study, diagnosis and treatment of sex and bladder dysfunction from a neurological perspective
- A focused reference for clinical practitioners and neurology research communities

## **Editorial Review**

From the Back Cover

The neurology of sex and bladder disorders requires specialized knowledge and represents a challenge for clinical neurologists. Sexuality is a major component of patient quality of life, and dysfunctions of lower urinary tract (LUT) are vital, as they may lead to chronic infection, dilatation of the upper urinary tract, renal insufficiency, and death. Despite the high prevalence of sexual and LUT disorders, most physicians are ill prepared to discuss them with their patients, let alone to diagnose and treat them. Further, these disorders are often related to more general neurological disorders like Parkinson Disease and MS, yet often the sex and bladder disorders are passed to specialists in urology. This volume is an attempt to reverse these trends and illustrate to neurologists that sexual and LUT function need to be addressed by them for reasons of correct diagnosis and possible therapeutic consequences. This focused yet comprehensive overview provides complete tutorial reference to the science, diagnosis and treatment of sex and bladder disorders from a neurologic perspective.

### About the Author

Dr. David B. Vodušek is Full Professor of Neurology at the University of Ljubljana, Slovenia, Faculty of Medicine, and Medical Director, Division of Neurology, University Medical Center Ljubljana, Slovenia.

Dr. Vodušek was born and raised in Slovenia. He received his medical degree from the University of Ljubljana in 1976, where he subsequently worked as a lecturer in Neurology. He completed his Ph.D. at the Institute of Clinical Neurophysiology, Ljubljana, in 1982, having spent time in the Department for Clinical Neurophysiology, Uppsalla, Sweden, and at the Institute of Neurology, Queen Square, London, UK. In 1982 he obtained a Slovenian specialist degree in Neurology. He was appointed as full Professor of Neurology at the University of Ljubljana, Slovenia, in 1997. He has been visiting assistant professor at Baylor College, Houston, Texas, USA (1982-83) and New York University Medical center, NY, USA (1991, 1993). Dr. Vodušek worked as a Consultant in Ibn Sina Hospital, Kuwait (1986-1987). From 1991 to 1996 Dr. Vodušek was Head of the Institute of Clinical Neurophysiology in Ljubljana. 2004 - 2007 he has been Chair of Neurology, Medical Faculty, University of Ljubljana, Slovenia. Since 1996, he is Medical Director of the whole Division of Neurology, University Medical Center Ljubljana.

Dr. Vodušek is a member of the Slovene and German Neurological Association, British Association of Clinical Neurophysiology, and many international societies including the the European Academy of Neurology, the European Federation of Autonomic Societies, and the International Continence Society. He serves on the Editorial Board of Neurourology and Urodynamics.

During his career, Dr. Vodušek has authored more than 100 articles in peer-reviewed international journals and Chapters in international Editions, and has been invited speaker on topics related to neurology, clinical neurophysiology and uro-neurology in several world and international congresses and in university departments across the globe.

Dr. Vodušek is currently member of the Board of the European Academy of Neurology (Chair, Liaison Committee), and Treasurer of the Section of Neurology, UEMS.

Dr. Vodušek's research interests include uro-neurology, clinical neurophysiology, peripheral neurology and cognitive neurology.

François Boller, M.D., Ph.D. has been co-Series Editor of the Handbook of Clinical Neurology since 2002. He is a board-certified neurologist currently Professor of Neurology at the George Washington University Medical School (GW) in Washington, DC. He was born in Switzerland and educated in Italy where he obtained a Medical Degree at the University of Pisa. After specializing in Neurology at the University of Milan, Dr. Boller spent several years at the Boston VA and Boston University Medical School, including a fellowship under the direction of Dr. Norman Geschwind. He obtained a Ph.D. in Experimental Psychology from Case Western Reserve University in Cleveland, Ohio where he was in charge of Neuroscience teaching at the Medical School and was nominated Teacher of the Year. In 1983, Dr. Boller became Professor of Neurology and Psychiatry at the University of Pittsburgh where he founded and directed one of the first NIH funded Alzheimer Disease Research Centers in the country. In 1989, he was put in charge of a Paris-based INSERM Unit dedicated to the neuropsychology and neurobiology of cerebral aging. He returned to the United States and joined the NIH in 2005, before coming to GW in July 2014.

Dr. Boller's initial area of interest was aphasia and related disorders; he later became primarily interested in cognitive disorders and dementia with emphasis on the correlates of cognitive disorders with pathology, neurophysiology and imaging. He was one of the first to study the relation between Parkinson and Alzheimer disease, two processes that were thought to be unrelated. His current area of interest is Alzheimer's disease and related disorders with emphasis on the early and late stages of the disease. He is also interested in the history of Neurosciences and is Past President of the International Society for the History of Neurosciences. He was the founding Editor-in-Chief of the European Journal of Neurology, the official Journal of the European Federation of Neurological Societies (now European Academy of Neurology). He is a Fellow of the American Academy of Neurology and a member of the American Neurological Association. In addition, he has chaired Committees within the International Neuropsychological Society, the International Neuropsychology Symposium, and the World Federation of Neurology (WFN). He has authored over 200 papers and books including the Handbook of Neuropsychology (Elsevier).

## **Users Review**

### **From reader reviews:**

#### **Josephine Lowe:**

Do you have favorite book? If you have, what is your favorite's book? E-book is very important thing for us to know everything in the world.
