Editorial Review

From School Library Journal

Grade 4-8-This sight-based tutorial uses a carefully paced series of basic modules and constant reinforcement to teach even mildly motivated readers how to recognize six northern hemisphere constellations, four stars, and a galaxy. Readers will also learn how to spot planets along the plane of the ecliptic, and to use stars to tell which way is north. Each page has a simplified black sky view with a brief instruction or comment-"Okay, so find the Big Dipper in this piece of sky"-in white. Readers are urged to pause at the end of each of the three sequential sections before tackling the next exercise. A hefty selection of print and Web resources, plus advice about choosing and using a telescope, provides "Next Steps." Though not specifically aimed at them, children will have no trouble using this unusual, informal approach to making sense of the night sky. The associated Web site offers, among other features, a discussion of the pedagogical method.

Review

A fascinating, clever, and delightful book. -- *Ken Lang, Tufts Professor of Astronomy and author of The Cambridge Encyclopedia of the Sun*

As entertaining as it is effective. -- *PBS, July 2003*

Don't expect an ordinary book. -- *Washington Post, July 2003*

Innovative and irresistible...this book is addictive. -- *Richard Ellis, reviewing editor of Science magazine*

No sentient person should be without these basic tools for looking up. We owe it to ourselves. -- *Neil deGrasse Tyson, Director, Hayden Planetarium, New York City*

From the Inside Flap

Stikky Night Skies has four parts:

Sequence One introduces the constellation Orion and its famous star Betelgeuse, constellations Cassiopeia and the Big Dipper, and tells you where to look for planets in the sky. It also teaches you how to find the star Polaris and use it to figure out which way is north. You should read this sequence in one sitting if possible.

Sequence Two builds on what you have learned in Sequence One, adding constellations Cygnus, Taurus and the Pleiades, stars Sirius and Vega, and the Milky Way galaxy. Ideally, you should leave a few days, but no more than a week, between completing Sequence One and reading Sequence Two.

The Epilogue, a special feature of Stikky books, brings together everything you have learned and reinforces it in some new and unfamiliar situations. Again, you should leave a few days between completing Sequence Two and reading the Epilogue.

If, by the end of the book, you are hungry to find out more, as we hope you will be, you will find dozens of things to explore in the Next Steps section.

Users Review

From reader reviews:

Patrick Lyon:

Have you spare time for just a day? What do you do when you have far more or little spare time? Sure, you can choose the suitable activity regarding spend your time. Any person spent all their spare time to take a stroll, shopping, or went to the particular Mall. How about open or even read a book called Stickey Night Skies: Learn 6 constellations, 4 stars, a planet, a galaxy, and how to navigate at night--in one hour, guar (Stickey series)? Maybe it is to become best activity for you. You recognize beside you can spend your time together with your favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have some other opinion?

Shirley Williams:

What do you concentrate on book? It is just for students as they are still students or that for all people in the world, the particular best subject for that? Only you can be answered for that query above. Every person has several personality and hobby for each and every other. Don't to be forced someone or something that they don't would like do that. You must know how great along with important the book Stickey Night Skies: Learn 6 constellations, 4 stars, a planet, a galaxy, and how to navigate at night--in one hour, guar (Stickey series). All type of book could you see on many options. You can look for the internet options or other social media.

Martina Lassiter:

As people who live in often the modest era should be upgrade about what going on or information even knowledge to make these keep up with the era which can be always change and move forward. Some of you maybe will update themselves by reading through books. It is a good choice for you but the problems coming to a person is you don't know which one you should start with. This Stickey Night Skies: Learn 6 constellations, 4 stars, a planet, a galaxy, and how to navigate at night--in one hour, guar (Stickey series) is our recommendation to make you keep up with the world. Why, because this book serves what you want and need in this era.

Maria Peterson:

That e-book can make you to feel relax. That book Stickey Night Skies: Learn 6 constellations, 4 stars, a planet, a galaxy, and how to navigate at night--in one hour, guar (Stickey series) was multi-colored and of course has pictures on there. As we know that book Stickey Night Skies: Learn 6 constellations, 4 stars, a planet, a galaxy, and how to navigate at night--in one hour, guar (Stickey series) has many kinds or type. Start from kids until adolescents. For example Naruto or Investigator Conan you can read and think you are the character on there. So , not at all of book tend to be make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book for yourself and try to like reading in which.
