Paper and Water: A Guide for Conservators (Routledge Series in Conservation and Museology) By Gerhard Banik, Irene Bruckle

This is the first compendium for conservation professionals involved in the preservation of paper artifacts in archives, libraries and fine art museums around the world. The global team of expert authors explain the principal interactions between paper and water, a topic of primary importance for every conservator working with paper artifacts and other cellulose-based materials. The work integrates knowledge from the different disciplines of paper engineering, conservation science and conservation practice, and will serve as a textbook in a rapidly expanding profession that has virtually no customized education literature.

Water is present when paper is made. It contributes to its deterioration and serves many essential functions when deteriorated paper is treated by conservators. Drawing on paper industry and science research, *Paper and Water* examines the relationship between paper and water. Throughout the book, theoretical information concerning basic principles that underlie the interaction of paper and water is presented in close association with practical information that informs the reader about mechanisms that govern conservation procedures.

Topics discussed in the book include: structure and properties of dry and wet paper; structure and properties of water; paper production steps relevant to the interaction between paper and water; influence of humid climate conditions on the deterioration of paper; principles of aqueous deacidification; preparation and use of aqueous solutions, methods of treating paper with water, as well as factors influencing their effectiveness; mechanisms of drying paper during its production; methods of drying paper in conservation; historical and ethical dimensions of aqueous treatment in paper conservation.

Taking its inspiration from undergraduate and graduate science education textbooks, and tested widely through use in workshops with students and specialist professionals in both Europe and USA, this book is highly illustrated to make learning an efficient and pleasurable experience. Visual material exclusively produced for this publication includes video animations, laboratory videos, and key references which appear on an accompanying DVD. Each

chapter in the book and video on the DVD are linked, but can also function independently.

Several authors contributed to the manuscript, among them Dr Vincent Daniels, Research Fellow, Royal College of Art, London; Professor D Steven Keller, Associate Professor, Paper Science and Engineering, SUNY-College of Environmental Science and Forestry, Syracuse, New York; Joanna Kosek MA, Acting Head, Western Pictorial Art, The British Museum, London; Dr Anthony W. Smith, Camberwell College of Art, London; and Professor Paul Whitmore, Director, Research Center on the Materials of the Artist and Conservator, Carnegie Mellon University Pittsburgh, PA. Videos and Animations are by Professor Alfred Vendl, and Stefan Fischer, Technical Chemistry - Science Visualisation, Institute for Art and Technology at the University of Applied Arts, Vienna.

The project and the book are financially supported by the Leonardo da Vinci Programme, European Union, and by a prestigious Conservation Publication Grant of the H. Samuel Kress Foundation provided through the American Institute for Conservation of Historic and Artistic Works. 'Paper and Water' is supported internationally by the Institute for Paper Conservation (IPC); the International Centre for the Study of the Preservation and Restoration of Cultural Property (ICCROM); and International Association of Book and Paper Conservators (IADA).

Editorial Review

Review

Winner of the 2013 AIC Publications Award!

About the Author

Stefan Fischer studied art history, history and classical archaeology in Munster, Amsterdam and Bonn. In 2009 he completed his doctoral thesis on Hieronymus Bosch: Malerei als Vision, Lehrbild und Kunstwerk. His specialist fields are Netherlandish painting of the 15th to the 17th century and museology.

Users Review

From reader reviews:

Raymond Harris:

Have you spare time for any day? What do you do when you have much more or little spare time? That's why, you can choose the suitable activity for spend your time. Any person spent their own spare time to take a move, shopping, or went to often the Mall. How about open or perhaps read a book called Paper and Water: A Guide for Conservators (Routledge Series in Conservation and Museology)? Maybe it is for being best activity for you. You realize beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with their opinion or you have additional opinion?

Micah Clark:

This book untitled Paper and Water: A Guide for Conservators (Routledge Series in Conservation and Museology) to be one of several books in which best seller in this year, this is because when you read this e-book you can get a lot of benefit onto it. You will easily to buy this book in the book retailer or you can order it through online. The publisher of the book sells the e-book too. It makes you easier to read this book, since you can read this book in your Cell phone. So there is no reason to you to past this book from your list.

Francis Gibbs:

People live in this new day of lifestyle always try and and must have the free time or they will get lots of stress from both day to day life and work. So, if we ask do people have extra time, we will say absolutely without a doubt. People is human not a robot. Then we question again, what kind of activity do you possess when the spare time coming to you of course your answer will probably unlimited right. Then ever try this one, reading textbooks. It can be your alternative throughout spending your spare time, the particular book you have read is usually Paper and Water: A Guide for Conservators (Routledge Series in Conservation and Museology).

Henry Stehle:

Reading can be called a head hangout, why? Because if you find yourself reading a book specifically a book entitled *Paper and Water: A Guide for Conservators* (Routledge Series in Conservation and Museology) your brain will drift away through every dimension, wandering in each and every aspect that maybe unknown for but surely might be your mind friends. Imaging each and every word written in a book then become one contact form conclusion and explanation that will maybe you never get before. *The Paper and Water: A Guide for Conservators* (Routledge Series in Conservation and Museology) giving you an additional experience more than blown away the mind but also giving you useful information for your better life within this era. So now let us explain to you the relaxing pattern is your body and mind will likely be pleased when you are finished reading through it, like winning a casino game. Do you want to try this extraordinary investing spare time activity?
