The Academic Library of the 90s: An Annotated Bibliography (Bibliographies and Indexes in Library and Information Science) By Rashelle S. Karp

The end of the 1980s and the beginning of the 1990s have been a time of great change for academic libraries and librarians. Rapid developments in technology have revolutionized the libraries' means and mission, while declining budgets have adversely impacted the ability of librarians to carry out their roles. The literature of academic librarianship today reflects these changes and points to the direction in which academic libraries are headed.

This book is a comprehensive guide to book chapters and articles written on academic librarianship between 1990 and 1993. Entries for nearly 1,700 works are grouped in six topical chapters for ease of use. Each entry includes an informative annotation that summarizes the key points made by the authors, the major findings of research projects, and the names and locations of libraries with innovative programs. Extensive author, article, book/journal title, and subject indexes conclude the work. The volume is a useful tool for locating specific information on various topics, and it is a forecast of the future of academic libraries.

Editorial Review

From Library Journal

This year seems an appropriate time to document the voluminous literature on college and university libraries published in the first third of the decade. Karp (Clarion Univ.) offers a useful annotated bibliography covering books, articles, ERIC documents, dissertations, and related materials published between 1990 and 1993. Its 1,662 citations are divided into six sections: academic libraries as a whole, administrators and administrative concerns, access services, technical services, and the future and role of academic libraries and librarians. Author, article title, book/journal title, and subject indexes provide access to related citations throughout the work. Obviously, such bibliographies become dated very quickly, but this one is invaluable, serving as a handy, single-volume guide to recent literature. Library/information science educators, students, and practicing librarians will find it useful for research purposes. Recommended to all academic libraries. ?Stephen L. Hupp, Capital Univ. Lib., Columbus, Ohio

Review

"Given the availability of electronic databases dedicated to library and information science, one might justifiably question the need for this annotated bibliography. Yet its format, succinct evaluative summaries, and comprehensiveness easily the need for the purchase by academic libraries and library science departments. ... Librarians and researchers will find this bibliography a timesaving and valuable tool to consult for information about their profession and its myriad activities."-ARBA

"This is a very useful resource for anyone desiring to perform a quick search of the recent literature."-Public Library Quarterly

"In this valuable volume Rashelle Karp has brought together citations and annotations for some 1,662 journal articles and book chapters concerning academic libraries that were published during the first four years of the decade of the 1990's....this handy book will be a desirable accession in academic libraries and library schools, as well as in the personal collections of any practitioners in the field ..." -Collection Management
