Way Out There In the Blue: Reagan, Star Wars and the End of the Cold War By Frances FitzGerald

Using the Star Wars missile defense program as a magnifying glass on his presidency, Pulitzer Prize-winning journalist Frances FitzGerald gives us a wholly original portrait of Ronald Reagan. Drawing on extensive research, FitzGerald shows how Reagan managed to get billions in funding for a program that was technologically impossible by exploiting the fears of the American public. The Reagan who emerges from FitzGerald's book was a gifted politician with a deep understanding of the national psyche, and an executive almost totally disengaged from the policies of his administration. Both appalling and funny, *Way Out There in the Blue* is the most penetrating study of Reagan's presidency to date.
