What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science) From Ekman, Paul (EDT)/ Rosenberg, Erika L. (EDT)

While we have known for centuries that facial expressions can reveal what people are thinking and feeling, it is only recently that the face has been studied scientifically for what it can tell us about internal states, social behavior, and psychopathology. Today's widely available, sophisticated measuring systems have allowed us to conduct a wealth of new research on facial behavior that has contributed enormously to our understanding of the relationship between facial expression and human psychology. The chapters in this volume present the state-of-the-art in this research. They address key topics and questions, such as the dynamic and morphological differences between voluntary and involuntary expressions, the relationship between what people show on their faces and what they say they feel, whether it is possible to use facial behavior to draw distinctions among psychiatric populations, and how far research on automating facial measurement has progressed. The book also includes follow-up commentary on all of the original research presented and a concluding integration and critique of all the contributions made by Paul Ekman.

As an essential reference for all those working in the area of facial analysis and expression, this volume will be indispensable for a wide range of professionals and students in the fields of psychology, psychiatry, and behavioral medicine.

Editorial Review

Review

"*What the Face Reveals* dramatically illustrates the value of precise measurement of facial behavior in illuminating an impressive range of issues in basic and applied research. The chapters present innovative state-of-the-art applications of facial measurement, and the commentaries by authors and editors greatly enrich the readers experience. This is affective science of the highest quality, brimming with intriguing findings and promising new directions." --Robert W. Levenson, Professor of Psychology, University of California, Berkeley and Director of the Institute of Personality and Social Research and the Berkeley Psychophysiology Laboratory

About the Author

Paul Ekman was a Professor of Psychology for 32 years in the Department of Psychiatry at the University of California at San Francisco. He also served as chief psychologist in the U.S. Army, Fort Dix New Jersey from 1958-1960. His interests have focused on two separate, but related topics: He originally focused on nonverbal behavior, and by the mid-60s concentrated on the expression and physiology of emotion. His other interest is interpersonal deception. His research program was supported by grants from the National Institute of Mental Health, the National Science Foundation, and the Advanced Research Projects Agency of the DOD, loosely affiliated with UCSF. His many honors have included the Distinguished Scientific Contribution Award of the American Psychological Association in 1991, and an honorary doctor of humane letters from the University of Chicago in 1994. Dr. Ekman retired from UCSF in 2004. He currently serves as the chairman of the board of the Institute of Analytic Interviewing and continues to consult on research and training related to emotion and deception. **Erika Rosenberg** is an emotions researcher, a health psychologist, and an expert in facial expression measurement. Dr. Rosenberg currently consults with a variety of academic and non-academic clients on issues related to facial behavior, teaches workshops in FACS and emotional communication, and is a Lecturer in the Department of Psychology at the University of California, Davis.

Users Review

From reader reviews:

Mary McKay:

The book *What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science)* gives you the sense of being enjoy for your spare time. You should use to make your capable far more increase. Book can for being your best friend when you getting strain or having big problem with the subject. If you can make looking at a book *What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science)* to be your habit, you can get a lot more advantages, like add your own capable, increase your knowledge about several or all subjects. It is possible to know everything if you like available and read a guide *What the Face Reveals: Basic and Applied Studies of Spontaneous Expression*

Using the Facial Action Coding System (FACS) (Series in Affective Science). Kinds of book are a lot of. It means that, science book or encyclopedia or other individuals. So , how do you think about this e-book?

Catherine Ng:

Book is to be different for every grade. Book for children right up until adult are different content. To be sure that book is very important for all of us. The book *What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science)* had been making you to know about other information and of course you can take more information. It is quite advantages for you. The book *What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science)* is not only giving you much more new information but also to get your friend when you truly feel bored. You can spend your own spend time to read your book. Try to make relationship with all the book *What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science)*. You never truly feel lose out for everything in the event you read some books.

Roy Stoudt:

Do you one among people who can't read enjoyable if the sentence chained inside the straightway, hold on guys this particular aren't like that. This *What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science)* book is readable simply by you who hate those perfect word style. You will find the information here are arrange for enjoyable examining experience without leaving actually decrease the knowledge that want to provide to you. The writer regarding *What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science)* content conveys the idea easily to understand by most people. The printed and e-book are not different in the content material but it just different as it. So , do you still thinking *What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science)* is not loveable to be your top list reading book?

Patricia Sax:

Is it you who having spare time and then spend it whole day by means of watching television programs or just lying down on the bed? Do you need something totally new? This *What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science)* can be the reply, oh how comes? A book you know. You are consequently out of date, spending your spare time by reading in this brand-new era is common not a geek activity. So what these books have than the others?
