The Flying Circus of Physics By Jearl Walker

Witness astounding feats of physics

Hurry! Hurry! Come one, come all. Meet a man who can pull two railroad passenger cars with his teeth and a real-life human cannon ball. Come face to face with a dead rattlesnake that still bites. And unlock the secrets to the magician's bodiless head.

Welcome to Jearl Walker's Flying Circus of Physics, 2nd Edition, where death-defying stunts, high-flying acrobatics, strange curiosities, and mind-bending illusions are all part of everyday life. You don't need a ticket; you only need to look to the world around you to uncover these fascinating feats of physics.

Completely updated and expanded, this Second Edition of Jearl Walker's best-selling book features more than 700 thoroughly intriguing questions about relevant, fun, and completely real physical phenomena. Detailed explanations and references to outside sources guide your way through the problems.

You'll discover answers to such questions as:

- * Can you start a fire with ice?
- * Why does the sky turn green just before a tornado?
- * Why do wintergreen LifeSavers glow in the dark when you bite them?
- * If you are falling in an elevator, should you try to jump up at the last second or lay flat against the floor?
- * How do electric eels produce their electric field?
- * Why is wet sand darker than dry sand?
- * What causes an oasis mirage?
- * Why do stars twinkle?
- * Could you drive a car on a ceiling?

Editorial Review

Review

Supplement Available -- *The publisher, John Wiley & Sons*

From the Publisher

This new version now contains answers to all the over 600 stimulating questions. Walker covers the entirety of naked-eye physics by exploring problems of the everyday world. He focuses on the flight of Frisbees, sounds of thunder, rainbows, sand dunes, soap bubbles, etc., and uses such familiar objects as rubber bands, eggs, tea pots, and Coke bottles. Many references to outside sources guide the way through the problems. Now the inclusion of answers provides immediate feedback, making this an extraordinary approach in applying all of physics to problems of the real world.

Users Review

From reader reviews:

Leo Osborne:

A lot of people always spent their free time to vacation as well as go to the outside with them loved ones or their friend. Did you know? Many a lot of people spent that they free time just watching TV, or playing

video games all day long. If you need to try to find a new activity honestly, that is look different you can read a new book. It is really fun in your case. If you enjoy the book that you read you can spent 24 hours a day to reading a publication. The book The Flying Circus of Physics it is rather good to read. There are a lot of folks that recommended this book. We were holding enjoying reading this book. In case you did not have enough space to deliver this book you can buy the actual e-book. You can m0ore very easily to read this book from your smart phone. The price is not too costly but this book provides high quality.

Carla Floyd:

That book can make you to feel relax. This particular book The Flying Circus of Physics was colourful and of course has pictures on the website. As we know that book The Flying Circus of Physics has many kinds or type. Start from kids until adolescents. For example Naruto or Detective Conan you can read and feel that you are the character on there. Therefore , not at all of book are make you bored, any it offers you feel happy, fun and rest. Try to choose the best book to suit your needs and try to like reading that will.

Ron Taylor:

As a university student exactly feel bored to be able to reading. If their teacher expected them to go to the library or to make summary for some publication, they are complained. Just little students that has reading's soul or real their hobby. They just do what the educator want, like asked to go to the library. They go to right now there but nothing reading critically. Any students feel that looking at is not important, boring along with can't see colorful images on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this The Flying Circus of Physics can make you sense more interested to read.

Gerard Norman:

Reading a guide make you to get more knowledge from this. You can take knowledge and information from the book. Book is prepared or printed or illustrated from each source in which filled update of news. In this particular modern era like at this point, many ways to get information are available for anyone. From media social similar to newspaper, magazines, science reserve, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to open your book? Or just searching for the The Flying Circus of Physics when you needed it?
